

## CASE STUDY ST. ANDREW'S CE PRIMARY SCHOOL

Client | St. Andrew's CE Primary School  
Date | March 2010

### H-B DESIGNS UNDERTOOK THE FOLLOWING CYCLE PARKING PROJECT FOR St. Andrew's CE Primary School

#### Project Overview

Two possible sites were identified for the new cycle parking system. The chosen site 'edge of playground bordering the main playing field' seeming to be the less favourable at the time was ultimately given the green light over the initial primary site as it ticked all the projects main requirements, firstly meeting the set project budget, secondly providing sufficient bike parking and lastly allowing the new system to be safely and easily utilized while at the same time allowing the sculptural aspects to be enjoyed by all. The system was installed in two days. Project posters were provided to St. Andrews to assist in promoting the new bike parking and for every parking space provided H-B Designs awarded a free T-shirt with the 'I Run Ride, Skate, Scoot, Pedal logo, just to help things along.

#### Brief

- a) Project to be implemented in line with available budgets.
- b) Provide a long term sustainable and modular bike park facility for no less than 20 bikes.
- c) That all the new bike parking panels have 'BrightStar' decoration.
- d) All bikes parked into the system are to have dedicated parking slots and locking points.
- e) Low or zero maintenance is required for any new parking.
- f) Parking at all locations should function safely and fit in with the day to day regime of that area.
- g) New systems to be delivered as a turnkey project; consult, supply, project manage and install.
- h) Bike park to be of dual use and act as sculptural interactive playground installation.

#### System

3 single sided entry - Mini WonderWall BrightStar panels (23 bike capacity)  
10 linear meters - TrackPave wearing surface  
2 standard - StrongBoy demarcation bollards

#### WonderWall Benefits

- modular high density cycle parking system
- super tough product
- <sup>[1]</sup> 30 yr. Design life
- low maintenance product
- <sup>[2]</sup> 4R compliant
- <sup>[3]</sup> 48 month warranty
- designed and made in England
- individual bike parking cradle and lock off point
- single side and double sided bike loading panels
- integrates with H-B DESIGNS product range
- panel c/w pre-cast reusable foundation
- range of options and accessories
- fast efficient cost effective installation
- brand / customize to requirement

*[1] figure stated is nominal life expectancy*

*[2] 4R - Relocate Renovate Reuse Recycle*

*[3] warranty - conditions apply*

## CASE STUDY ST. ANDREW'S CE PRIMARY SCHOOL

### Project management

H-B Designs will assess, consult and manage the works to completion and handover

Project Leader\* Tim Hill-Baldwin

Site Project Manager Wayne Davies

### Civil Installation and Commissioning

H-B Designs provided the necessary and associated civil engineering works required for the safe and efficient installation of the specified system/s. Including all necessary drawings and documentation (*other than planning permissions and/or building control unless otherwise previously agreed*) for the project including task specific Health and Safety executive standards, risk assessment and method statement for each site.

### Testimonial

Dear Tim

REF: BIKE RACK

I am writing to tell you how delighted we are with our newly installed bike rack.

Not only is it very practical, but it is also a beautiful sculpture which really brightens up our playground.

I would also like to compliment your company for providing an excellent team to complete the installation; they were extremely efficient and polite causing very little disruption to our school day.

I will certainly recommend HB Designs to other colleagues.

Yours sincerely

Jane Wheatley Head Teacher  
St. Andrews Primary School
